Код ELKO: 1389542

Полное название: SOLAR PANEL 220W/SP220S BLUETTI

Заводской код: SP220S

УКТВЭД: 8501310098

Гарантия: 2 года

The Bluetti SP200S 220W Solar Panel is a foldable panel made of a laminated and durable ETFE material. This material makes the panel durable, scratch-resistant and therefore has a longer life. The sturdy handle at the top of the panel makes it easier to move the solar panel. Due to the sturdy kickstand at the back, the panel can be placed at a 45-degree angle, so that the panel is always facing the sun at an optimal angle. The SP200 panel consists of 4 connected panels, which are distributed over a total surface of 226 x 54 cm. Folded it is only 60 x 54 cm and weighs 7 kg. The panel is equipped with Sunpower solar cells with a high efficiency of 24%. During good weather conditions, Bluetti's 220W panel can generate an average of 1100Wh or more daily. The solar panel is supplied as standard with a 3 meter MC4 cable. Via this connection it is possible to connect the solar panel in combination with an adapter to a portable power station.
